

Empower students, faculty, and staff to communicate more effectively in any context.

The responsible, impactful AI writing partner that's built for the institution.

Grammarly for Education is the trusted AI writing partner that helps everyone within an institution communicate more effectively in every writing task. Grammarly for Education supports students and faculty with every phase of communication, from brainstorming to composition, to revision, and comprehension. Building upon Grammarly's legacy as a student-first writing assistant and 15+ years of responsible AI, Grammarly for Education offers institutions enterprise-grade security, faculty-specific features, analytics, and optional generative AI features for specific user groups.

The benefits of Grammarly for Education extend across the institution, helping faculty and staff save time, grade more equitably, and optimize curriculum. Students can improve their writing and grades over time, with seamless, consistent writing suggestions that preserve the author's voice and original thinking. Grammarly never shares or sells data to third parties and does not train on your institution's text data.

Trusted by over
3,000 accredited institutions
